## Home Theater Acoustic Treatment Systems

Experts all agree that acoustic control treatments are the surest way to unlock the full performance of any home theater system. The Dimension4™ systems are the latest series of pre-engineered acoustic treatment solutions from MSR, Inc. They are designed for private screening rooms, home theaters, media rooms, and gaming rooms. Dimension4 systems are full-frequency solutions that ensure improved accuracy, focus, envelopment, and tonal balance.

Dimension4 systems are available in three performance levels: Symphony (high-end), Concerto (intermediate), and Melody (entry-level). Utilizing a scientific combination of high-performance composite absorbers, diffusers, and bass traps, each system is calculated to provide best-in-class sound quality. Each performance level is available for small, medium, and large rooms to ensure there is a size that's right for you. Simply start with the base system and add Upgrade 1 or 2 for larger rooms.

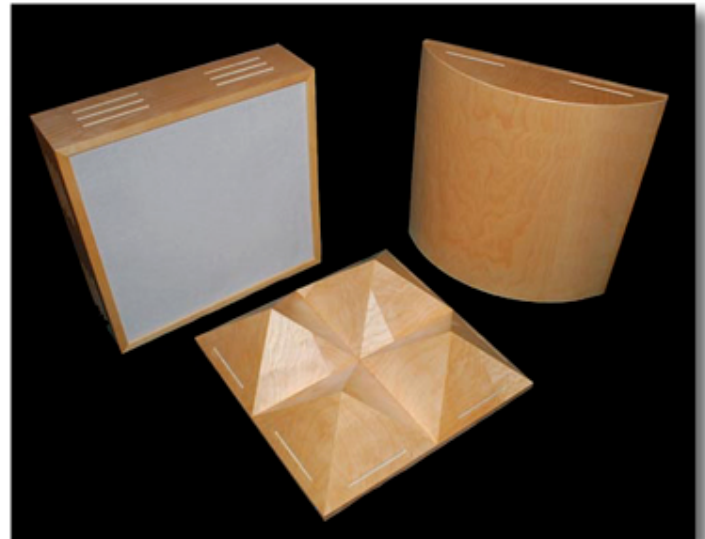

Dimension4 systems feature modules for your walls that provide reflection and echo control, as well as spatial diffusion. Also included are ceiling panels to dissipate detrimental vertical first reflections and bass absorber traps to address the low-frequency balance of the room. The absorbers utilize a patented composite of environmentally friendly rockwool and fiberglass for high-performance sound control.

For more info go to [www.msr-inc.com](http://www.msr-inc.com) or call (800) 497-2087.

### Dimension4 Symphony

As the flagship of the Dimension4 series, the Dimension4 Symphony system offers high-end acoustic control for the uncompromising home theater aficionado. Dimension4 Symphony is comfortable in the most demanding screening rooms. Symphony is the only Dimension4 system to include the award-winning\* MSR SpringTrap™ bass trap standard.

Available in a variety of wood finishes and fabric colors.

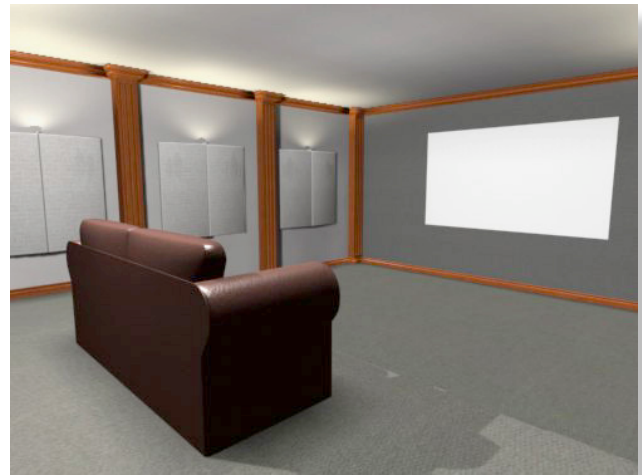

Symphony System:  
12 Absorbers  
14 Diffusers  
2 Ceiling Clouds  
2 SpringTraps  
\$6,920

### Dimension4 Concerto

The mid-level Dimension4 Concerto system offers enhanced sound control for the quality-conscious home theater enthusiast. With its high-performance absorbers, diffusers, and Bazorber™ bass traps, the Dimension4 Concerto system is the ultimate choice for media and game room environments.

Available in a variety of fabric colors.

Concerto System:  
6 Absorbers  
6 Diffusers  
2 Ceiling Clouds  
2 Bazorbers  
\$3,290

### Dimension4 Melody

The entry-level Dimension4 Melody system offers outstanding value and room control for the budget-conscious home theater owner.

Melody is built on the same patented composites of high-performance Rockwool and fiberglass as the Symphony and Concerto systems. Furthermore, the clever use of wedge strips for diffusion, and corner panels for bass control, make the Dimension4 Melody system the ultimate choice in flexibility and value.

Available in gray and tan fabric colors.

Melody System:  
6 Absorbers  
12 Diffuser Strips  
2 Ceiling Clouds  
4 Corner Traps  
\$1,299

MSR also supplies a full line of acoustic materials including: absorption treatments in any size and shape, diffusion treatments, bass traps, specialty sound isolation construction materials, and sound doors and windows.

\*The MSR-exclusive SpringTrap™ bass trap received the Mix Magazine “Certified Hit” award.
